Available immediately | Arabic Native | English B2 | French B2 | Dutch A2 (improving)

PROFESSIONAL PROFILE

Functional Analyst with 4+ years of experience bridging business needs and technical delivery in enterprise and SaaS environments. Core strength is requirements engineering: gathering, analyzing, and documenting business requirements, modelling processes with UML and BPMN, writing functional specifications and API documentation (Swagger/OpenAPI), and managing stakeholders. This functional expertise is embedded with Java and Spring Boot development, which allows close and clear collaboration with IT teams. Delivered functional analysis in enterprise-scale operations (in Finance, Fitness, HR and logistics sectors). Holds an MBA in IT Management (2025). Before moving into IT, competed internationally as a professional Muay Thai and kickboxing fighter ([see Prior Career below](#)).

PROFESSIONAL EXPERIENCE

Functional Analyst & Java Developer, Logistics SaaS

09/2025 – Present

Mute Belgium, Transport Sector, Belgium

End-to-end SaaS platform for Belgian logistics companies. Combined functional analysis and development role: defined requirements, designed solutions, and built the platform.

- Conducted full functional analysis with the client: mapped existing paper-based processes, defined optimized digital workflows, and documented functional requirements for the platform.
- Identified operational pain points (manual route planning, no dispatcher visibility, paper delivery confirmation) and translated them into concrete functional and technical specifications.
- Facilitated stakeholder sessions with dispatchers and operations managers to validate requirements and test delivered features.
- Defined and documented API specifications (Swagger OpenAPI), user stories, and acceptance criteria for each platform module, demonstrating direct experience specifying integration contracts between systems.
- Delivered the platform with E2E testing (backend, web dashboard, and mobile app) based on the documented functional requirements.
- Outcome: approximately 40% reduction in route planning time, and full digitalization of paper-based logistics workflows.

Environment: Agile Jira, Swagger API, UML, PlantUML, BPMN, Java Spring, Angular, FastAPI, PostgreSQL, Docker

Functional Analyst, HR SaaS

08/2024 – 08/2025

Nova IT Group, Yaano / LTS Consulting, Brussels, Belgium

HR and recruitment SaaS platform. Functional analysis role within an Agile team.

- Gathered and documented business requirements from HR and recruitment stakeholders and translated them into user stories and functional specifications.
- Modelled recruitment workflows (candidate pipeline, onboarding, role management) ahead of implementation.
- Coordinated functional testing, non-regression testing and UAT with business users.
- Participated in sprint planning, stand-ups, retrospectives, and demo sessions as functional analyst.

Java Backend Developer (Internship), HR SaaS

07/2023 – 08/2024

Nova IT Group, Yaano / LTS Consulting, Brussels, Belgium

HR and recruitment SaaS platform. developer role within an Agile team.

- Implemented recruitment workflows (candidate pipeline, onboarding, role management) in Spring Boot, integrated with the Angular frontend.
- Participated in sprint planning, stand-ups, and demo sessions as a developer.

Environment: Agile Jira, Swagger API, UML, Visio, Java Spring, Angular, MySQL, CI/CD, Github, Docker

Functional Analyst & Java Developer, Financial & Fitness sector

01/2019 – 01/2021

Leejam Sports Company (Fitness Time), Riyadh, Saudi Arabia

Largest fitness operator in Saudi Arabia and UAE, with 200+ locations, 100,000+ active members, and 41+ cities. Enterprise IT environment with SAP, and custom Java systems.

- Acted as the bridge between business stakeholders and IT teams across multiple locations: gathered, analyzed, documented, and validated business requirements, including membership billing and financial reporting flows.

- Conducted existing process modelling of operational workflows (membership subscriptions, financial reporting, access control, HR scheduling, payments) and defined the new processes to support digital transformation initiatives.
- Translated complex business needs from finance and operations departments into functional specifications consumed by development and tester teams, including recurring-billing and payment-status logic for membership accounts.
- Facilitated working sessions with subject matter experts and stakeholders to identify opportunities for process and system optimization.
- Produced and maintained technical documentation: user stories, functional specs, API documentation, and KPI definitions for operational dashboards.
- Coordinated functional testing: validated system behavior against requirements, tracked defects, and documented findings, including reconciliation checks on membership payment records.
- Developed Java backend modules implementing validated business logic for membership, payments and billing systems, scheduling, access control, and reporting.

Environment: Agile Jira, SAP, Swagger API, UML, PlantUML, JWT, Data structure, Java Spring, React, PostgreSQL, CI/CD, Github

PRIOR CAREER — PROFESSIONAL MUAY THAI & KICKBOXING

International Muay Thai & Kickboxing Fighter

2015 – 2019

Tunisian National Team, Thailand & International Circuit

- WFM World Champion (Türkiye, 2017) and ISKA African Titleholder (2016).
- Member of the Tunisian National Team with 25 professional fights, including bouts in Thailand, the home of Muay Thai.
- 5-times Tunisian national champion.

Boxing Portfolio: saadaoui.it.com/boxing

EDUCATION

MBA: Management in Information Technology (Remote)

10/2024 – 08/2025

Universidad Isabel I, Madrid, Spain

IT Management, Digital Strategy, Business Innovation, Change Management. Graduated 08/2025.

Bachelor: Software & Network Project Management

09/2021 – 07/2024

EFFICOM Lille / Campus Liberté, Lille, France

Software project management, requirements analysis, DevOps practices, and Agile/Scrum delivery.

Bachelor in Information Technology

08/2014 – 07/2017

ESPRIT, Tunisia

Programming, hashing, computer networks, Algorithm, databases, and information systems analysis.

High School Diploma: Computer Science

09/2010 – 07/2014

Médenine, Tunisia

Scientific baccalaureate with a computer science specialization: algorithmics, programming fundamentals, and information systems.

SKILLS & COMPETENCIES

Functional Analysis

Analysis methods: AS-IS/TO-BE process modelling, gap analysis, feasibility analysis, impact analysis

Requirements: Business requirements, functional specifications, user stories, acceptance criteria, API documentation

Stakeholder management: Facilitation of workshops, interviews, validation sessions

Testing: Functional testing, NRT, UAT coordination, defect tracking, test case documentation

Process & API modelling: UML, BPMN (PlantUML, Visio), API documentation (Swagger/OpenAPI)

Tools: Confluence, Jira, Swagger/OpenAPI, PlantUML, Visio, draw.io, Git

Technical

Backend: Java, Spring Boot, REST APIs, FastAPI

Frontend: Angular, React

Databases: PostgreSQL, MySQL

Domains of interest: Finance, Transaction processing, High Tech

Methodology

Agile / Scrum: Sprint planning, stand-ups, retrospectives, and demo facilitation (4 years)

Project management: Planning, follow-up, coordination, documentation, change management

Languages

Arabic: Native

English: B2 —Intermediate

French: B2 —Intermediate

Dutch: A2 — Basic (actively improving, enrolled in Dutch classes)

CERTIFICATIONS

- MBA: IT Management | Universidad Isabel I | 08/2025
- Java Full Stack Developer | IBM | 10/2023
- Version Control with Git | Meta | 08/2023
